

CLIENT: METROVICKS SPORT AND SOCIAL CLUB

PROJECT: MOSS ROAD, STRETFORD

Background

Metrovicks Sports and Social Club has been established for over 100 years and during a difficult financial period, has turned to The Seddon Group to help secure the club's future.

The Project

The project will comprise the remodeling and construction of a new sports and social clubhouse with new build apartments and homes for sale.

New and modern, the clubhouse and bowling green have been carefully designed to ensure construction phasing allows the club to continue operating throughout the project.

A Local Authority Planning Moratorium was in place and in order to successfully steer it through the process a full programme of public and political support was undertaken.

Seddon also held an open day and viewing event for local club members to allow them to see a display of how the project will look, all of which received very positive feedback.

Client Comment

“The construction and remodeling of our new club required sophisticated and sensitively thought-out plans which Seddon has worked hard to successfully deliver.

“Their thorough approach to the project, from gaining the support of members to enabling the continued use of the club, has been testament to Seddon's professional attitude and clear understanding of our requirements. We look forward to continuing this strong working partnership over the next few years.”
